Longer wearlife for Base Edge Caps

## Kenco fabricated moldboard caps cover

One of the quickest ways to destroy the structural integrity of a good bucket is to not protect the moldboard bevel against wear. This damaging wear often appears as a scallop-like pattern. Kenco's heavy duty solution to this problem is our Fabricated Moldboard Cap.

100% of the moldboard top is covered with AR steel and 100% of the bevel is protected with Tungsten Carbide. The assembly is conveniently held in place with cutting edge bolts. (Simply use cutting edge bolts 1/2" longer than normal).

*Still proudly made in the USA*
